

# Package ‘leukemiasEset’

October 8, 2016

**Type** Package

**Title** Leukemia's microarray gene expression data (expressionSet).

**Version** 1.8.0

**Date** 2013-03-20

**Author** Sara Aibar, Celia Fontanillo and Javier De Las Rivas. Bioinformatics and Functional Genomics Group. Cancer Research Center (CiC-IBMCC, CSIC/USAL). Salamanca. Spain.

**Maintainer** Sara Aibar <saibar@usal.es>

**Depends** R (>= 2.10.1), Biobase (>= 2.5.5)

**Description** Expressionset containing gene expression data from 60 bone marrow samples of patients with one of the four main types of leukemia (ALL, AML, CLL, CML) or non-leukemia.

**License** GPL (>= 2)

**LazyLoad** yes

**biocViews** Tissue, Genome, Homo\_sapiens\_Data, CancerData, LeukemiaCancerData, MicroarrayData, ChipOnChipData, TissueMicroarrayData, GEO

**NeedsCompilation** no

## Description

ExpressionSet containing gene expression data from 60 bone marrow samples of patients with one of the four main types of leukemia (ALL, AML, CLL, CML) or no-leukemia controls.

Platform: Affymetrix Human Genome U133 Plus 2.0  
 Annotation: genemapperhgu133plus2 (CDF from GATEExplorer)  
 Mapping: Gene Ensembl ID (20172 features)

Tissue: Bone Marrow  
 Cell type: Mononuclear cells isolated by Ficoll density centrifugation  
 Disease type:

1. Acute Lymphoblastic Leukemia (ALL). Subtype: c-ALL / pre-B-ALL without t(9;22)
2. Acute Myeloid Leukemia (AML). Subtype: Normal karyotype
3. Chronic Lymphocytic Leukemia (CLL)
4. Chronic Myeloid Leukemia (CML)
5. Non-leukemia and healthy bone marrow (NoL)

All samples were obtained from untreated patients at the time of diagnosis.

Preprocessing: The microarrays were normalized with [RMA](#) using a redefined probe mapping from *Affymetrix* probesets to *Ensembl* genes (Ensembl IDs ENSG). This alternative Chip Definition File (CDF) with complete unambiguous mapping of microarray probes to genes (GeneMapper) is available at GATEExplorer (<http://bioinfow.dep.usal.es/xgate/mapping/mapping.php>) (*Risueno et al. 2010*).

## Usage

```
data(leukemiasEset)
```

## Format

[ExpressionSet](#) with phenoData:

- Project: "Mile1" for all samples
- Tissue: "BoneMarrow"
- LeukemiaType: Leukemia type acronym: "ALL", "AML", "CLL", "CML" or "NoL"
- LeukemiaTypeFullName: The full leukemia type name.
- Subtype: "AML with normal karyotype and other abnormalities", or "c\_ALL/Pre\_B\_ALL without t(9 22)" if applies

## Details

Package:	leukemiasEset
Type:	Package
Version:	1.0
Date:	2013-03-13

License: GPL (>=2)  
LazyLoad: yes

### Author(s)

Author: Sara Aibar, Celia Fontanillo and Javier De Las Rivas. Bioinformatics and Functional Genomics Group. Cancer Research Center (CiC-IBMCC, CSIC/USAL). Salamanca. Spain.

Maintainer: Sara Aibar <saibar@usal.es>

### Source

This is a subset of the samples collected by the Microarray Innovations in Leukemia (MILE) study (Kohlmann *et al.* 2008, Haferlach *et al.* 2010). Full study microarray raw data can be found at the NCBI Gene Expression Omnibus database (GEO, <http://www.ncbi.nlm.nih.gov/geo/>) under series accession number GSE13159. The selected samples are labelled keeping their source GEO IDs.
